

# Sociology

for students starting at Ohio State AU22 and after (and following the New GE)

***In general, Sociology is a liberal arts/social science major that provides students with the scientific tools and social perspective necessary to better understand social issues and complex societal problems.***

Sociology is the study of group life. Sociologists investigate the structure of groups, organizations and societies. The goal is to understand the characteristics, causes and consequences of human behavior and social relationships in various kinds of group settings. Because human behavior is diverse, the field of Sociology covers a wide range of subjects. Sociologists may specialize in the following areas:

<b>family</b>	<b>education</b>
<b>urban community</b>	<b>health &amp; medicine</b>
<b>social movements</b>	<b>deviance</b>
<b>crime and law</b>	<b>religion</b>
<b>work and occupations</b>	<b>sports and leisure</b>
<b>gender and sex roles</b>	<b>politics</b>
<b>racial &amp; ethnic minorities</b>	

## Graduate, Professional & Law School

Sociology is also a valuable major for students planning to attend graduate or professional school. Sociology provides a rich foundation of knowledge regarding a variety of fields. Undergraduate Sociology majors frequently go on to post-baccalaureate programs in law, business, administration, social work, public health, urban planning, public policy management and other various social science fields.

## Careers

There are few jobs that have the title "Sociologist" for those who hold Bachelors degrees. However, Sociology is a relevant discipline that helps to prepare students for a variety of careers and for graduate or professional education. Major sectors of employment for graduates of our program include:

Community/Non-profit (fundraising, social service organizations, or child welfare agencies)

Health and social services (family planning, substance abuse, rehabilitation counseling, group work with youth or the elderly, recreation, or administration)

Criminal justice and corrections (law enforcement, probation, parole)

Business community (advertising, marketing, consumer research, insurance, real estate, and personnel work or training)

Federal, state, or local government (transportation, housing, agriculture and labor)

Sociology majors compete with other liberal arts graduates for these types of positions. However, a strong program of study and careful selection of courses coupled with practical experience will produce a competitive advantage in the marketplace.
